

# Master the stock market

Enrol for the Technical Analysis for Trading Professionals Programme

### How do I benefit from this training course?

The 'Technical Analysis for Trading Professionals' course is conceptualised for individuals aspiring to become professional traders.

Light would be shed on the common doubts plaguing every trader -

- Is the rally a new trend or only a counter-trend move?
- Why do some chart patterns pan out and others fail?
- How to ride the winners for a long time by ignoring the intermittent corrections
- Scaling down the portfolio size / trading bets by identifying the maturity of the price move

The course will attempt to equip you with the skill to distinguish, courage to execute and patience (rare quality) to hold your trades.

### Who should attend this course?

This programme is suitable for anyone who wishes to be a professional trader / investor. No prior technical knowledge is required to attend this programme.

This programme starts with building fundamentals of Technical Analysis and proceeds to tools and techniques used by professional traders.

### Who will teach you?

Bharat Dugar is a professionally qualified market expert and full time trader, who has a rich experience in analysing markets. He was amongst the first twenty Indians to get the prestigious CMT certification - highest qualification for a technical analyst, and is part of an elite global group of technical analysts.

He is currently working as a Fund Manager for a proprietary book overseeing assets worth billions. His focus on risk mitigation strategies and expertise with technical tools has helped him make better investment decisions in his career, spanning more than two decades. He has worked with leading broking houses as a research analyst and during his stint, authored many research reports and magazines. Dec 2007 issue of the magazine 'Market Focus' is where he articulated the strong possibility of a market correction, was one of the many applauded articles.

He is also an expert speaker who has delivered over 100 sessions on technical analysis on various platforms.

### Course coverage:

1. Basics Revisited in an Advanced Manner – In-depth understanding of the basic concepts that would be required by any professional trader.
2. Elliott Waves – Identifying high-probability trade setups using the wave principle, thereby tremendously improving the trading odds.
3. Stock Selection Process – All the popular techniques are geared towards answering 'When to Buy and When to Sell.' This module focuses on the often neglected but perhaps more important question 'What to Buy and What to Sell'.
4. Multi-Time Frame Analysis – The same stock can be in different phases of the trend depending on the periodicity chosen. This module examines the trend of a stock in three different time periods to access trading action.
5. Abandoning Stereotypes – Many of the erstwhile technical analysis techniques have started showing mediocre results. This module will help you to understand how to tweak the existing concepts to reinvigorate their trading performance.
6. Crystallization of the concepts learnt using practical examples.

### Course structure:

#### Day 1:

Session 1: Introduction to the program and exercises to build the aptitude for trading. Basic concepts of Dow Theory, Trendlines, Support & Resistance revisited with an intricate understanding of the psychology behind them

Session 2 & 3: Introduction to Elliott Wave and its tenets

Session 4: Identifying trading opportunities using the wave principle

#### Day 2:

Session 5: Defining the stock selection process

Session 6: Learning the art of multi-time frame analysis

Session 7: Unconventional use of traditional technical analysis concepts

Session 8: Cementing the learning using practical examples

### Program fees:

**MRP: ₹15,000**
